EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife.

Please see our website for the latest information: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>

Regular updates will be posted as they are available.

Subject: RWI Water Storage Tanks and Evaporators

Hello Shaun,

My name is Randall Jochim and I work for Resource West in Grand Junction CO. I understand you are overseeing the water issue down in the Durango CO area. I want to see if any of our products could be of assistance. Please take a look at the two brochures I have attached regarding our evaporation units and our temporary above ground water storage tanks and let me know if you have any questions.

Thank you,

Randall Jochim

Evaporation Division Manager
